Annual Field Report 2026 (sample)

Summary: the pilot reduced delivery times by 18 percent across 42 routes while fuel costs fell 7 percent.

Method: routes were re-planned nightly with an optimizer and compared against the previous year’s schedules.

Risks and next steps

Main risk: driver adoption was uneven; two depots kept manual planning for most of the quarter.

Next step: expand to 120 routes by June 2027 and add live traffic data. Budget requested: 85,000 USD.
